PAMM & LPOA Terms

FuryFortuna Ltd - PAMM Investment and Limited Power of Attorney (LPOA) Terms and Conditions

Version 2.0 - Effective September 2026 - Supersedes all prior versions

1. Scope & Ecosystem Overview

These Percentage Allocation Management Module (PAMM) Terms & Conditions and Limited Power of Attorney ("PAMM Terms") govern the legal, operational, and financial relationship between:

- The Broker: FuryFortuna Ltd ("Company," "FuryFortuna," "Broker"), an International Business Company incorporated under the laws of Saint Lucia (IBC Registration No. 2026-00491), providing trading infrastructure, secure portal services, and automated software allocation engines.
- The PAMM Investor: The registered client ("Investor," "you") who allocates capital to a designated PAMM Master Account.
- The PAMM Manager: An authorized client ("Manager," "Trader") operating a central Master Account and executing

trading strategies on behalf of the capital allocated by participating Investors.

Multi-Account Allocation Mechanics: A PAMM account is a specialized software allocation structure. The Manager trades a centralized Master Account, and trading volume, profit, and loss outcomes are automatically allocated proportionally among participating Investor sub-accounts based on their relative equity ratios at order execution and settlement.

These PAMM Terms supplement and form an integral part of the FuryFortuna Client Agreement, Risk Disclosure Statement, and Privacy Policy. In the event of any operational conflict, the primary Client Agreement shall prevail, save for matters specifically addressing PAMM software allocation procedures.

2. Limited Power of Attorney (LPOA) Authorization

2.1 Grant of LPOA Authority

By allocating funds to a PAMM Master Account, the Investor explicitly grants and delegates to the designated PAMM Manager a Limited Power of Attorney (LPOA) to:

- Trading Execution Authority: Execute, manage, modify, and close financial derivative orders (including Forex, CFDs, and digital asset derivatives) on the Investor's allocated sub-account equity.
- Risk Parameter Adjustments: Set stop-loss, take-profit, pending entry orders, and risk mitigation parameter

adjustments within the Master Account structure.

2.2 Strict Custodial & Withdrawal Limitations

> ⚠ STRICT CUSTODIAL & WITHDRAWAL LIMITATIONS
>
> The LPOA granted to the PAMM Manager is strictly limited to trading execution only. The Manager has NO authority, technical capability, or access to withdraw, transfer, pledge, or encumber Investor funds. All deposits and withdrawals can be initiated solely by the Investor through their personal secure Client Portal. FuryFortuna acts solely as a technological and execution intermediary, not an asset manager.

2.3 Automatic LPOA Revocation

The LPOA granted to a PAMM Manager is automatically revoked upon the complete un-allocation or full withdrawal of the Investor's funds from the designated PAMM Master Account, or upon the formal closure of the PAMM Master Account by the Broker.

3. Fund Custody, Segregation & Audit Trail Controls

FuryFortuna enforces strict fund custody standards across all PAMM software structures:

- Segregated Client Accounts: Investor funds allocated to PAMM sub-accounts remain legally owned by the individual Investor and are held in segregated client bank accounts separate from Company operational funds.
- No Manager Capital Access: PAMM Managers never take custody of or receive direct access to Investor capital. The Manager sees only cumulative equity totals required for position calculation.
- Automated Audit Trails & Allocation Logic: FuryFortuna maintains automated server-level allocation software that records, calculates, and maintains an immutable audit trail of all proportional order executions, equity adjustments, and fee deductions.

4. Performance Fees, Management Fees & Calculation Mechanics

4.1 High-Water Mark (HWM) Principle

Performance fees payable to a PAMM Manager are calculated based strictly on the High-Water Mark (HWM) principle:

- Net New Profit Threshold: Performance fees are charged exclusively on net new profits generated above the highest historical account equity peak previously achieved by the Investor's sub-account.
- Loss Recovery Protections: If a PAMM account incurs floating or realized trading losses, no performance fee will be calculated or deducted until total sub-account equity recovers and exceeds the prior High-Water Mark peak.

4.2 Fee Schedule & Automated Settlement Cycles

- Performance Fee: An agreed percentage (e.g., 20%) of net new profits above HWM, calculated and deducted automatically at scheduled settlement intervals (e.g., monthly or bi-weekly).
- Management Fee: An annualized percentage fee calculated daily based on total managed equity and settled periodically, where explicitly specified in the Manager's offer.
- Broker Fee Administration: FuryFortuna automatically processes fee deductions from sub-accounts and transfers verified net earnings directly to the Manager's wallet after auditing settlement integrity.

5. PAMM Deposits, Withdrawals & Settlement Rollover Cycles

5.1 Deposit Allocation Queuing

Capital deposits allocated to a PAMM Master Account are queued and processed during scheduled PAMM Rollover / Settlement Windows. This queuing mechanism prevents unexpected leverage jumps or open trade disruptions during active trading sessions.

5.2 Withdrawal Processing & Floating P&L Impact

Investors may request partial or complete capital withdrawals via the Client Portal. Withdrawal requests are processed during the next available PAMM Rollover Window after closing or adjusting the proportional trade lots allocated to the Investor.

Withdrawals are executed based on net sub-account equity at the exact time of rollover, incorporating all floating profits or losses.

6. Emergency LPOA Revocation & Account Detachment

An Investor retains the absolute right to emergency-revoke the LPOA and detach from a PAMM Master Account at any time via the Client Portal.

Upon triggering an emergency detachment request: (a) the LPOA is instantly terminated; (b) the Investor's allocated open positions are immediately liquidated at current prevailing market prices during the detachment process; and (c) remaining net equity is returned to the Investor's primary secure wallet.

7. 24/7 Portal Transparency & Real-Time Reporting

FuryFortuna provides Investors with 24/7 continuous access to their PAMM sub-account performance dashboard through the secure Client Portal. Investors can inspect real-time open positions, historical trading logs, High-Water Mark calculations, fee deduction statements, and allocated equity balances at any time.

8. Risk Warnings & Broker Performance Disclaimer

> ⚠ MANAGER PERFORMANCE
> DISCLAIMER & TRADING RISK NOTICE
>
> FuryFortuna does not employ, supervise, endorse, or guarantee the trading strategy or performance of any PAMM Manager. PAMM Managers are independent third-party traders. Past performance is strictly not indicative of future results. You may lose some or all of your invested capital. FuryFortuna accepts zero liability for financial losses resulting from PAMM Manager trading decisions.

9. Manager Conduct Rules, Abusive Practices & Broker Termination Rights

9.1 Application of Trading Abuse Rules

PAMM Managers must strictly comply with Section 5 of the FuryFortuna Client Terms & Conditions. PAMM Managers are prohibited from engaging in latency arbitrage, off-market price exploitation, swap abuse, toxic order flow, coordinated wash trading, or market manipulation.

9.2 Enforcement & Program Termination Rights

FuryFortuna reserves the right, in its sole discretion, to: (a) disqualify, suspend, or delist any PAMM Manager found

breaching conduct rules; (b) void abusive trades and claw back unearned performance fees; and (c) suspend or terminate the PAMM software infrastructure or specific Master Accounts at any time to preserve platform integrity or fulfill statutory obligations.

10. Statutory KYC/AML Regulatory Compliance

All PAMM Investors and Managers must complete mandatory Customer Due Diligence (CDD) and Enhanced Due Diligence (EDD) verification in compliance with the Saint Lucia Money Laundering (Prevention) Act and international FATF standards prior to allocating or accepting PAMM capital. FuryFortuna reserves the right to freeze PAMM allocations pending identity verification.

11. Policy Amendments & Governing Law

FuryFortuna reserves the right to update these PAMM Terms to reflect technological enhancements or regulatory changes. These PAMM Terms are governed by and construed in accordance with the substantive laws of Saint Lucia (including the International Business Companies Act), subject to the dispute resolution provisions set forth in our Client Agreement.

12. Investor Acceptance & Formal Legal Affirmation

By allocating funds to any PAMM Master Account across FuryFortuna portals, the Investor explicitly represents, warrants,

and affirms that:

- Terms Acceptance: You have read, understood, and agreed to be bound by these PAMM Terms & Conditions in their entirety.
- LPOA Delegation: You grant a Limited Power of Attorney to the designated PAMM Manager for trading execution strictly within the limits defined herein.
- Independent Choice: You acknowledge that FuryFortuna provides execution software infrastructure only and does not provide investment advice or guarantee Manager performance.
- Total Financial Risk: You understand that trading financial derivatives carries a high risk of loss and that you possess the financial capacity to sustain total loss of allocated capital.
